

Common words that trigger spam filters

(Mail Hosting: NTT Communications (Thailand) Co., Ltd.)

Below is a current list of the most popular words used in spam emails.

These words get higher spam points by evaluators. Once an email has too many spam points, it will get flagged as spam, either by outgoing filters or filters on the incoming mail servers.

Using one of these phrases once will not trigger an email as spam, but using a phrase repeatedly or many of these phrases together in the same email can cause it to be flagged as spam.

List of most common terms that trigger spam filters
