

I can send through webmail, But all of a sudden I can no longer send in my email client?

(Mail Hosting: NTT Communications (Thailand) Co., Ltd.)

This is usually caused by your ISP blocking port 25.
Many ISP's block port 25 in order to reduce outgoing spam.

If you have already changed Outgoing port number, then the problem still ...

Please take note of any error messages and contact support-mail team as soon as possible.
