

## Message exceeds size limit

(Mail Hosting: NTT Communications (Thailand) Co., Ltd.)

Message exceeds size limit:

```
<user@example.com>: host in7.example.com said:  
552 <user@example.com>... Mailbox is full  
  
Mailbox limit exceeded while appending message  
550 <user@example.com>... Can't create output  
  
<user@example.com>: host mail9.example.com said:  
552 Requested mail action aborted: exceeded storage allocation
```

These errors mean that the size of the message, including all headers, text and attachments, exceeds the domain's maximum per-message size limit - essentially, that your email is too big to be accepted.

You should try to reduce the size of the message, or try to split the email into smaller parts and resend it.

If you have any questions or concern ...

**Please take note of any error messages and contact support-mail team as soon as possible.**
